# GENÖ-LED

## → PROMOTION OF BIOACTIVITY WITH GENO-LED TUNNEL.

## → STUDIES AND RESULTS.

Data from a controlled study on the effect of LLLT on 830nm LED-speed wound healing and improvement of sequelae after ablative resurfacing by an Er: YAG laser + CO 2 on the entire face of 50 patients. 25 received a LED phototherapy. The wound healing rate was reduced by more than half, and sequelae usually associated with ablative resurfacing have been considerably improved.

## → CREATE SYNERGIES WITH GENO-LED.

GENO-LED tunnel is the perfect complement to a traditional skin care. It allows to create virtuous synergies and establish full skin treatment protocols. It can be combined with Cosmeceuticals products, PRP, or to complete a treatment that use techniques such as Micro Needling, Mesolifting... GENO-LED allows the relief of pain, reduction of wound healing, increasing DNA synthesis rate, cells activity, effect of rejuvenation of skin...
